

Note:

- This week's assignment is different. I want you all to concentrate on preparing for this week's class.
- You will need to submit a markdown document that implements the code that I have provided to you for this week in a file named `asn4.R`. The data file is available at <https://www.kaggle.com/ludobenistant/hr-analytics>.
- Parts A, B and C are shown in the R file itself.
- You will need to submit your assignment as a markdown document that the graders will run on their machine. You need not submit the html files.

Instructions

The idea of this assignment is for you to get familiar with some aspects of ggplot.

- (a) Please read and understand the code in the file that has been provided
- (b) Prepare one markdown file for Parts A, B, and C. Please make sure that the parts are shown clearly in the markdown file.
- (c) At the end of the markdown file, write a short note (≤ 200 words) about the analyses you conducted.

Part A (20 marks)

Part B (35 marks)

Part C (35 marks)

Write-up (10 marks)

Name your file as `A04_Gwid.rmd`. So if your GWID is G19860011 then you should name your submission file as `A04_G19860011.rmd`. Please make sure that you comment your R code.
